Dear Mr. Soknyra Te,

Seeking an IT job, I got the announcement from the PNC ERO team at my school that your company needs web development. I am so interested in applying for the position at your company. I am a person who likes to challenge myself with different kinds of environments. I wish I could work and adapt to your company's environment.

With the school projects such as creating a Facebook app, Quiz app, Game, and Personal website, I could improve a lot of my IT skills such design the website, managing data, using git hub, cleaning code, creating dynamic website, time and task management, problem-solving, leadership.

Besides the course work and any projects from the teacher, I also join a lot of workshops such as leadership, communication skill, and other technical skills provided by PNC's partners or outside companies. These workshops, now bring me into a confident person who can face and solve any problems by myself and also make me have critical thinking.

With my education and my experience background, I believe that I have enough qualifications to fit this position and especially build good value for your company to more developments. I would like an opportunity to future discuss the position and my qualifications. For more information, please contact me by phone number or email address above. Thank you for your time and consideration. I am looking forward to hearing from you soon.

Sincerely,

PHEARUN CHHUN
